

PETROLEUM RESIN-C9

6#

11#

SPECIFICATION:

Item	Index
Soften Point Range ℃ (Ball Method)	95～130
Color No. Sample: Toluene=1:1	6#——18#
Acid Value mgKOH /g	0.3 MAX
Ash Value %	0.05 MAX
Appearance	Flake or Granular with color from light yellow to dark brown

CHARACTER:

It is aromatic hydrocarbon resin, light yellow to darker brown granular or flake, with good transparency and luster, good solubility, compatibility, aqueous stability, insulation and chemical stability, and with good adhesiveness and heat conductivity.

USEAGE

Adhesive production: Used in adhesive, especially for melting glue and pressure-sensitive glue.

Coating production: Used in reinforced latex coating, also applied in oil soluble coating.

Rubber treatment: Used as adhesion booster

Printing ink production: It can be dissolved in hydrocarbon resin, it owns high soft point and stable performance, so it can be used in ink.

Paper making industry: Used in paper sizing agent

Other application: Used as oil field water treatment agent & slurry additives, pitch modified agent

PACKING:

Packed in 25kg PP bags.

STORAGE:

Keep it in cool, breezy warehouse, avoid direct sun.

Shelf life: 1 year.
